Also, I can't remember if we have ever met at our Edison facility, so just in case, attached is a map showing building locations.

After going through the security gate, you will turn right and be on the road that runs between buildings 205 and 10 on the map (entering on the upper right-hand corner of the map). Building 205 will be the first building you see on your left – park in the parking lot on your left, before you get to Building 205.
